

nat\_num\_t::operator-

nat\_num\_t::operator-=

nat\_num\_t::minus

```
graph LR; A[nat_num_t::operator-] --> C[nat_num_t::minus]; B[nat_num_t::operator-=] --> C;
```

The diagram illustrates a mapping from C++ operator notation to a specific function name. On the left, two white boxes with black borders contain the text 'nat\_num\_t::operator-' and 'nat\_num\_t::operator-='. On the right, a gray box with a black border contains the text 'nat\_num\_t::minus'. Two blue arrows originate from the right side of the left boxes and point towards the left side of the gray box, indicating that both operators are implemented by the 'minus' function.
