

nat_num_t::operator-

nat_num_t::operator-=

nat_num_t::minus

```
graph LR; A[nat_num_t::operator-] --> C[nat_num_t::minus]; B[nat_num_t::operator-=] --> C;
```

The diagram illustrates a mapping from two operator names to a single function name. On the left, there are two white rectangular boxes with black borders. The top box contains the text 'nat_num_t::operator-' and the bottom box contains 'nat_num_t::operator-='. On the right, there is a gray rectangular box with a black border containing the text 'nat_num_t::minus'. Two blue arrows originate from the right side of the top-left box and the right side of the bottom-left box, both pointing towards the left side of the gray box on the right.
